

## May 2016

### True (A) or false (B):

#### Medical negligence: Alternative claims resolution an answer to the epidemic?

1. The clinical negligence system currently in place in South Africa does not facilitate efficient and fair resolution of disputes.
2. A decline in professional practice standards is directly responsible for the deterioration in the overall claims environment in the country.

#### Mediation as an alternative solution to medical malpractice court claims

3. Claims in respect of minors only prescribe after they reach 18 years.
4. Touting by lawyers is legal but advertising is illegal.

#### Should drinking during pregnancy be criminalised to prevent fetal alcohol spectrum disorder?

5. Anyone aged 12 years and older can purchase alcohol in terms of the Liquor Act 59 of 2003.
6. Driving a vehicle with a blood-alcohol concentration of 0.05% and higher is a criminal offence in South Africa.

#### Constitutional, legal and regulatory imperatives for the renewed care and prevention of congenital disorders in South Africa

7. The United Nations Convention on the Rights of the Child concerns the rights of the disabled child without discrimination.
8. A national legislative framework does not exist in SA for the provision of medical genetic services.

#### May doctors refuse to treat rape survivors in order to avoid having to give evidence in court?

9. A medical emergency is defined as a situation where a person 'suffers a sudden catastrophe which calls for immediate medical attention'.
10. The South African Department of Health does not have a national policy guideline for victims of sexual offences.

#### Ethical considerations in implementing a biometric co-enrolment prevention system in clinical trials in South Africa

11. South Africa has become one of the leading locations for the conduct of clinical trials.

#### Client confidentiality: Perspectives of students in a healthcare training programme

12. The legal approach to confidentiality is based on an individualistic perception of patient autonomy.
13. Breaching confidentiality can never be acceptable in the practice of healthcare by medical practitioners.

#### Respect for vulnerability is a human right

14. Respect for vulnerability was used for the first time in the Belmont Report in 1979.
15. South African health legislation does not give expression to the concept of vulnerability.

#### But is this *really* the 'parent' or 'guardian'? Practical strategies for consent to child research in South Africa

16. A 'parent' is the biological or adoptive mother or father of a child.
17. A caregiver is a person who cares for a child but does not include a foster parent.

#### Ethical challenges in the social media in the healthcare context

18. Most social media sites have privacy settings that allow users to control and restrict access to their personal information.

#### Contextualising the role of the gatekeeper in social science research

19. A gatekeeper is described as someone who controls access to an institution or an organisation.
20. Researchers are in a position to control absolute confidentiality of focus group discussions involving their research participants.

A maximum of 6 CEUs will be awarded per correctly completed test.

The CPD programme for SAJBL will be administered by Medical Practice Consulting:  
 CPD questionnaires must be completed online at [www.mpconsulting.co.za](http://www.mpconsulting.co.za)  
 After submission you can check the answers and print your certificate.  
 Questions may be answered up to 6 months after publication of each issue.  
 Accreditation number: MDB015/176/02/2016 (Ethics)
